

Bambini Creativi Fall Fundraiser Event: Donation Confirmation Letter

November 23rd, 2019- Overland Park Convention Center [Tax ID-45-2589303]

We are writing to request a donation of support to the annual Bambini Creativi Fall Fundraiser. Funds raised from this event will be used to help bring Music and Movement opportunities to our students and school. We are uniting our efforts to bring our students the many benefits of working with instruments, musical technology, performing arts and sports equipment into our learning environment and educational program.

Donations will be offered in a silent or live auction and all proceeds will go directly to supporting the development of our Music and Movement Program. Additional funds raised will be used to deepen our commitment and resources towards the mission and vision of an International Baccalaureate education. You/ Your Company will receive recognition for your sponsorship of our Fall Fundraiser on our event website, in the printed program given to each attendee, on the bid sheet for the silent auction, on our display board with all the donor participants.

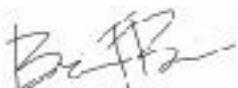

Bambini Creativi is a private Reggio Preschool and International Baccalaureate Candidate Elementary School serving the Kansas City Metro Area. Bambini Creativi's primary goal is to ensure every child falls in love with the wonders and joy of lifelong learning. Our educational program puts students at the center of their education by promoting inquiry based and individualized learning. We do this by honoring children's thoughts and perspective, teaching democracy as a responsibility, integrating sustainable practices, fostering a compassionate community, nurturing good stewards of the natural world, and discovering innovation through creative hands-on experiences. Bambini Creativi's educational experience ensures students gain the knowledge and confidence required to successfully move forward not just on their educational journeys but also in their life outside of school.

"Music is a universal art form that can encourage positive brain development in children. Music engagement activates many different areas of the brain and therefore has countless positive effects on child development. Children can increase gray matter in the auditory, motor, and visual-spatial areas of their brain by pursuing music. Additionally, children can also improve their speech processing and reading comprehension abilities through musical engagement, which will improve performance in all areas of life." - Education and Behavior, Natalie Wilson/ April 2017

We hope you will take this opportunity support our educational endeavors while gaining exposure and recognition for your business in our community.

We feel honored to have your support! Thank you for your consideration.

Brianne Teevan-Bongiovanni, Founder & Head of School
